

**Not just an idea*

BOOK OF EMOTIONS

The allure of recycled and reinterpreted materials is compelling both in the workplace and in domestic settings. Wood, steel, glass, and textiles come together in restyling projects that enhance not only aesthetics but also the functionality of spaces.

Currently, the RE POINT team is developing projects centered around the recontextualization of approaches and materials from different eras and locations.

This collaborative effort blends diverse personalities, skills, and passions, resulting in high-level craftsmanship, whether considering individual objects or within the context of a broader concept. We create furniture, objects, and lighting enriched with their own personality, designed to inspire wonder, amusement, and fascination.

L'attrattiva dei materiali riciclati e reinterpretati è avvincente sia sul posto di lavoro che negli ambienti domestici. Legno, acciaio, vetro e tessuti si uniscono in progetti di restyling che migliorano non solo l'estetica ma anche la funzionalità degli spazi. Attualmente, il team di RE.POINT sta sviluppando progetti incentrati sulla ricontestualizzazione di approcci e materiali provenienti da epoche e luoghi diversi.

Questo sforzo collaborativo fonde diverse personalità, competenze e passioni, dando vita a un'artigianalità di alto livello, sia nella considerazione di oggetti individuali che nel contesto di un concetto più ampio.

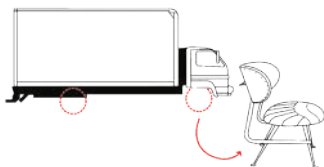

Creiamo mobili, oggetti e illuminazione arricchiti con una propria personalità, progettati per ispirare meraviglia, divertimento e fascino.
